

Ulster County Testing and Tracing Plan for COVID-19 as of October 13, 2020 for School Districts and Center for Spectrum Services

Center for Spectrum Services will follow the same plan for testing and contact tracing developed by Ulster County for school districts. We have inserted Spectrum Services in this document wherever school district was stated.

Background

On March 13, 2020 Ulster County Executive Patrick Ryan joined the Executives from Orange and Dutchess County ordering all schools in those counties to close for two weeks. On March 17, 2020 Governor Andrew Cuomo closed all schools in New York, and on May 1, 2020 he ordered further closures through June and called for schools to create school re-opening plans for the Fall. On Friday, August 7, 2020 Governor Cuomo announced that all schools in New York are permitted to re-open pending approval of their re-opening plan by New York State Education Department. The Governor required Center for Spectrum Services to post plans on testing, contact tracing and distance learning. On Tuesday, August 11, 2020 Ulster County Executive Ryan met with school district superintendents and

Spectrum Services and agreed that the Ulster County Department of Health will assist in drafting county-wide plans for testing and contact tracing.

Pursuant to the Interim Guidance for In-Person Instruction at Pre-K to Grade 12 Schools during the COVID-19 Public Health Emergency (<https://forward.ny.gov/phase-four-industries>) developed by the New York State Department of Health, this document contains the required Testing and Contact Tracing plans for Spectrum Services in Ulster County (“Responsible Parties”).

Purpose of Testing and Tracing Plans

Containment of COVID-19 outbreaks is a key component in returning to school safely, since the alternatives – indefinite school closures or uncontrolled community spread – are unacceptably harmful to students, staff and our communities. In order to prevent and contain outbreaks, it is essential that schools have the means to quickly identify individuals who may be infectious and prevent them from spreading COVID-19 to others.

Ideally, containment strategies rely on rapid, frequent, and accurate diagnostic testing to identify positive cases, followed by identification of contacts who may have been exposed and containment of further spread through isolation and quarantine. Testing identifies positive cases who are quickly isolated and monitored, case investigation and contact tracing identifies and quarantines possible exposures to limit further spread.

However, while testing capacity in Ulster County is adequate to support current levels of social and economic activity, it is likely that the reintroduction of in-person learning at all ages and in all locations may cause testing demand to exceed capacity, severely reducing our ability to contain community spread through traditional contact tracing methods. Ulster County is working with all testing partners to monitor and improve turnaround time, with a goal of reducing it to 48 hours or less in order to facilitate a testing-based protocol for case identification in the County’s schools.

Until testing capacity increases and turnaround times fall, our interim strategy to allow schools to reopen relies on pre-emptive screening to identify suspected COVID-19 cases, so that appropriate steps may be taken to isolate infectious individuals, identify potential exposures, and pre-emptively limit further exposures through targeted quarantines.

Spectrum Services Testing Plan

NYSDOH Plan Requirements

The plan needs to include where the testing will take place and who will be providing the testing and what circumstances the testing will occur and describe how Spectrum Services will work with local departments of health.

Spectrum Services will implement a testing protocol and procedure that is designed to prevent outbreaks while supporting in-person learning to the greatest extent possible. This requires Spectrum Services to:

- Establish and implement a screening process for all students, staff, faculty and visitors (including vendors and contractors)
- Identify where testing will take place, who will provide testing, and under what circumstances individuals will be tested
- Describe how these protocols and procedures will be coordinated with the efforts of the UCDOH

After Reopening

Upon the resumption of in-person instruction, whether for the entire Spectrum Services student population or a subset of students, Spectrum Services will implement a screening process consistent with the process described in this plan. The screening process will remain active until such time as the NYSDOH or UCDOH approves changes to the screening process.

The purpose of the Screening Process will be to proactively identify potential cases prior to the confirmation of positive cases through testing. This will enhance containment of spread of the virus to supplement 'normal' Contact Tracing of laboratory-confirmed cases.

Screening Process to Identify Suspected Cases

Spectrum Services will implement mandatory health screenings, including temperature checks, of students, faculty, staff, and, where applicable, contractors, vendors, and visitors to identify any individuals who may have COVID-19 or who may have been exposed to the COVID-19 virus.

Specifically, all individuals must have their temperature checked each day. If an individual presents a temperature of greater than 100.0°F, the individual must be denied entry into the facility or sent directly to a dedicated area prior to being picked up or otherwise sent home.

Spectrum Services will implement a remote health screening procedure, which is to be self-administered and self-reported prior to an individual's entry into school facilities. As appropriate these remote screenings may be performed via electronic survey, digital application, telephone or other means, and may involve the parent/legal guardian.

Spectrum Services will also designate one or more qualified individuals to conduct a secondary screening process for any student, staff, contractor, vendor, or visitor who presents with symptoms consistent with COVID-19 or who has reason to believe they may have been exposed to someone with COVID-19 (See Model Screening Questionnaire in Attachment 1).

If a student, faculty member or staff fail to report to school as requested and are absent for more than one day, the team screening the returning individual must ascertain whether the individual manifested any COVID-19 associated symptoms during their absence.

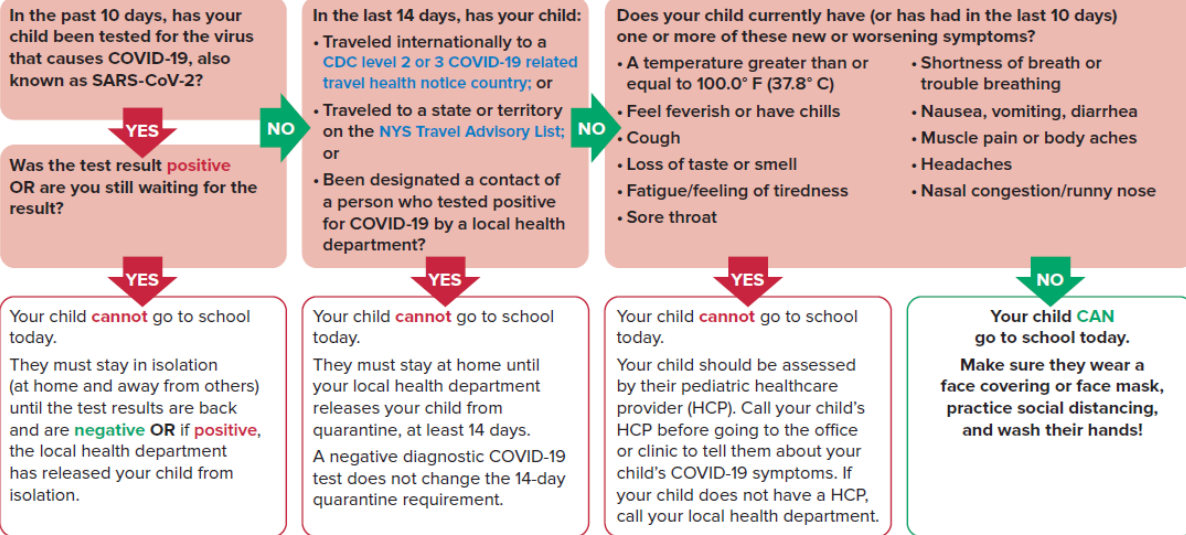

Managing Ill Students, Staff and Faculty

There are three general scenarios the school will face regarding the management of ill or potentially ill students, staff or faculty: The first is an individual presents with non-COVID-19 related symptoms, e.g. earache or muscular skeletal injury. In these cases where there are no COVID-19 symptoms the school health care team can use their standard medical protocols. In the case of individuals with COVID-19 associated symptoms or a history of contact with positive COVID-19 or an individual that has a positive test, we will follow the recommendations released in the NYSDOH Pre-K to GR 12 COVID Tool Kit as identified in the following 8 charts. **The incubation period for COVID-19 is 2 days to 14 days from symptom onset, therefore it is important for school personnel to ascertain when the individual first had symptoms. During the first 48 hours from symptom onset Spectrum Services is not required to send home contacts of the individual with symptoms but should direct the individual to their healthcare provider for further evaluation and testing. During these 48 hours Spectrum Services should work with the Ulster County Health Department to identify contacts and wait for test results, or an alternative diagnosis from the healthcare provider. If no results or alternative diagnosis are received within 48 hours, the school and UCDOH will consider the individual as a positive case and will quarantine and isolate contacts accordingly. If negative results are received sometime after the 48 hours, contacts will be treated as recommended on page C-3 of the NYSDOH Pre-K to GR 12 COVID Tool Kit.**

NYSDOH COVID-19 In-Person Decision Making Flowchart for Student Attendance

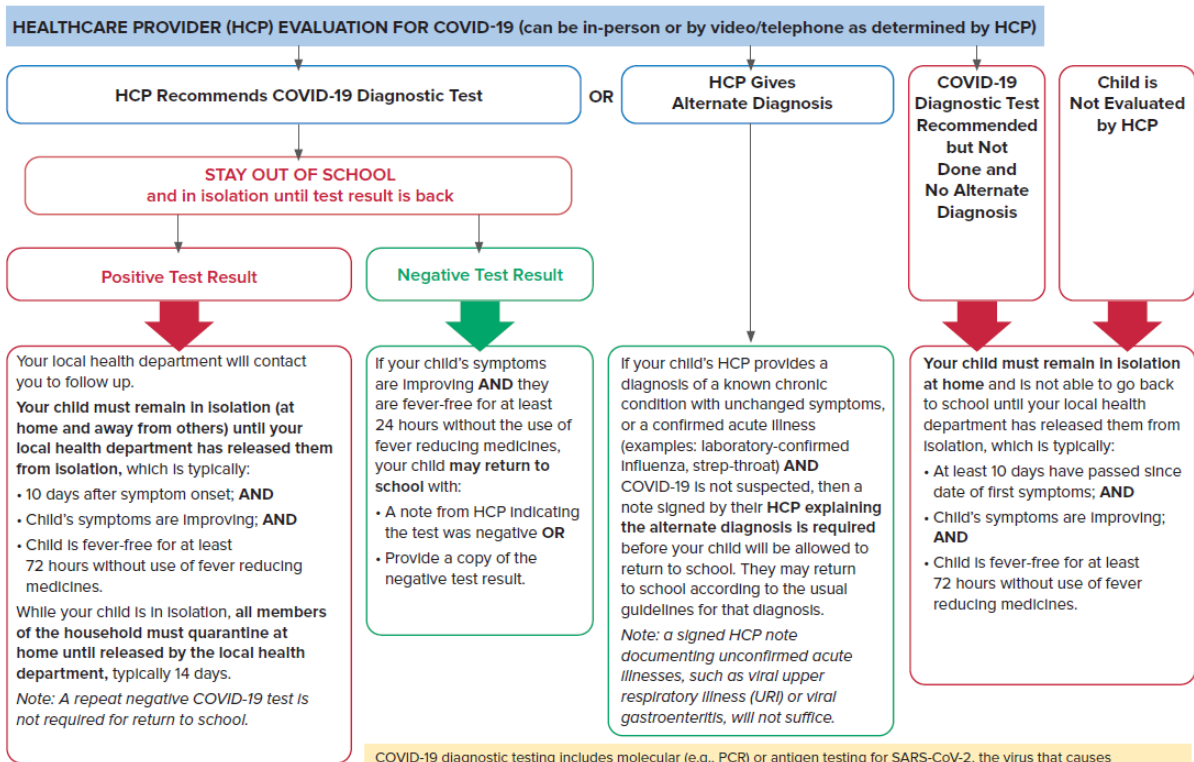

Can My Child Go To School Today?

Report absences, symptoms, and positive COVID-19 test results to your child's school.

SEEK IMMEDIATE MEDICAL CARE IF YOUR CHILD HAS:

- Trouble breathing or is breathing very quickly
- Prolonged fever
- Is too sick to drink fluids
- Severe abdominal pain, diarrhea or vomiting
- Change in skin color - becoming pale, patchy and/or blue
- Racing heart or chest pain
- Decreased urine output
- Lethargy, irritability, or confusion

**My child has COVID-19 symptoms. When can they go back to school?**

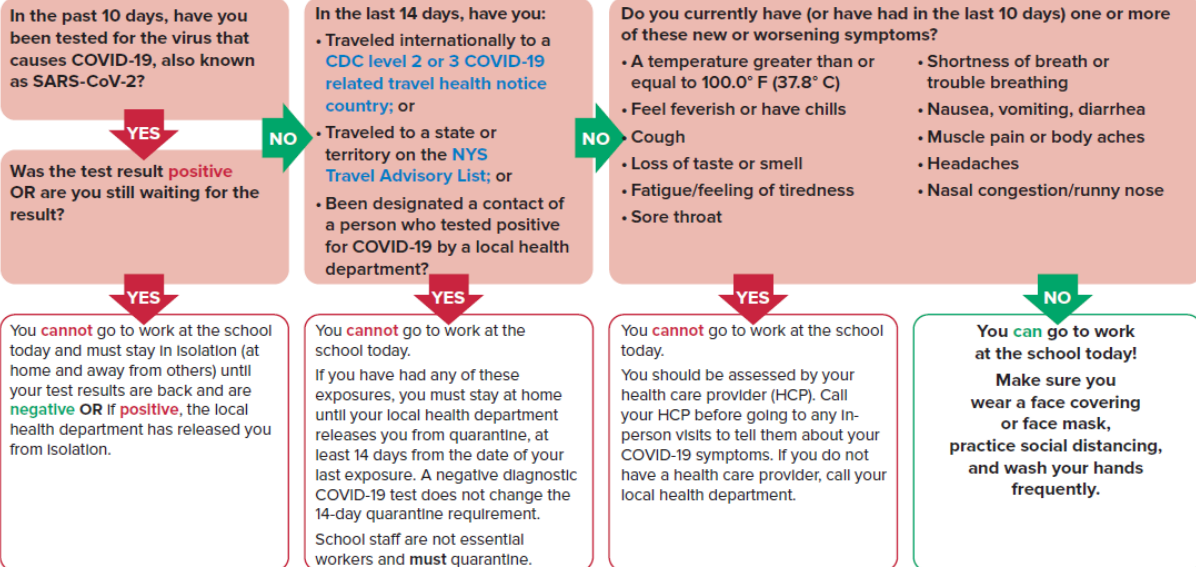

COVID-19 diagnostic testing includes molecular (e.g., PCR) or antigen testing for SARS-CoV-2, the virus that causes COVID-19. Diagnostic testing may be performed with a nasopharyngeal swab, nasal swab, or saliva sample, as ordered by the health care provider and per laboratory specifications. At times, a negative antigen test will need to be followed up with a confirmatory molecular test. Serology (antibody testing) cannot be used to rule in or out acute COVID-19.

September 2020 | A-2

NYSDOH COVID-19 In-Person Decision Making Flowsheet for Staff To Go To Work

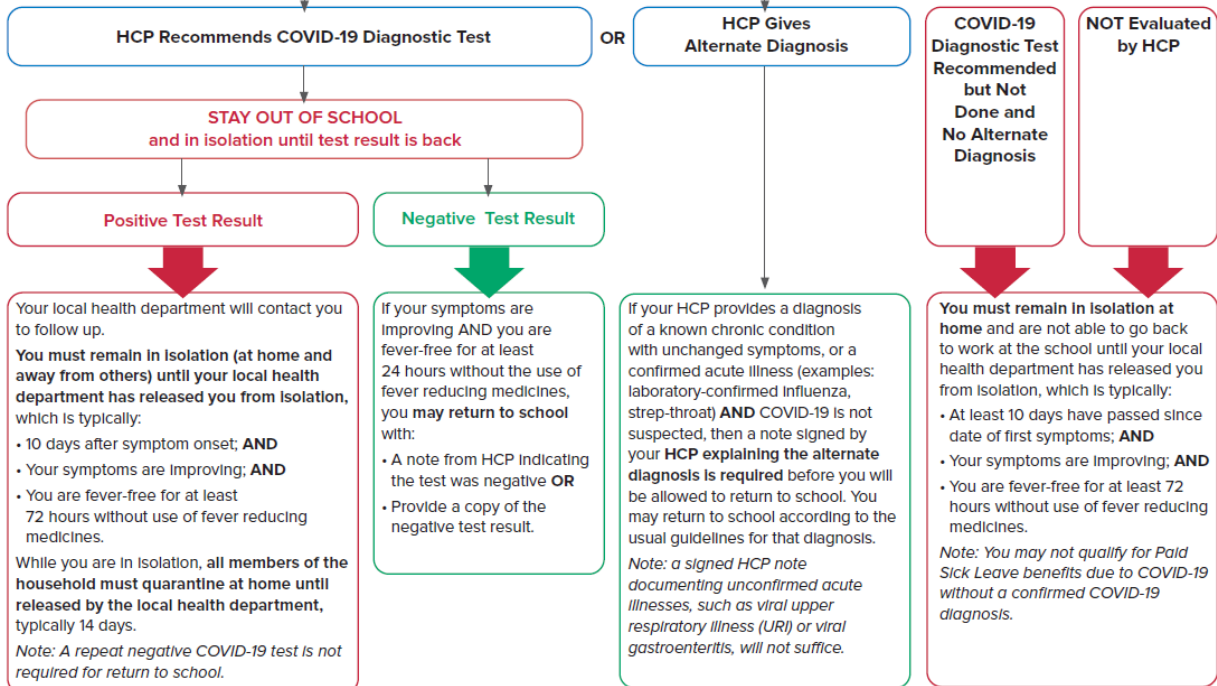

Can I Go to Work at the School Today?

Report absences, symptoms, and positive COVID-19 test results to your school.

SEEK IMMEDIATE MEDICAL CARE IF YOU HAVE:

- Trouble breathing or are breathing very quickly
- Are too sick to drink fluids
- Severe abdominal pain, diarrhea or vomiting
- Change in skin color - becoming pale, patchy and/or blue
- Racing heart or chest pain
- Decreased urine output
- Lethargy, irritability, or confusion

**I have COVID-19 symptoms. When can I go back to work at the school?****HEALTHCARE PROVIDER (HCP) EVALUATION FOR COVID-19 (can be in-person or by video/telephone as determined by HCP)**

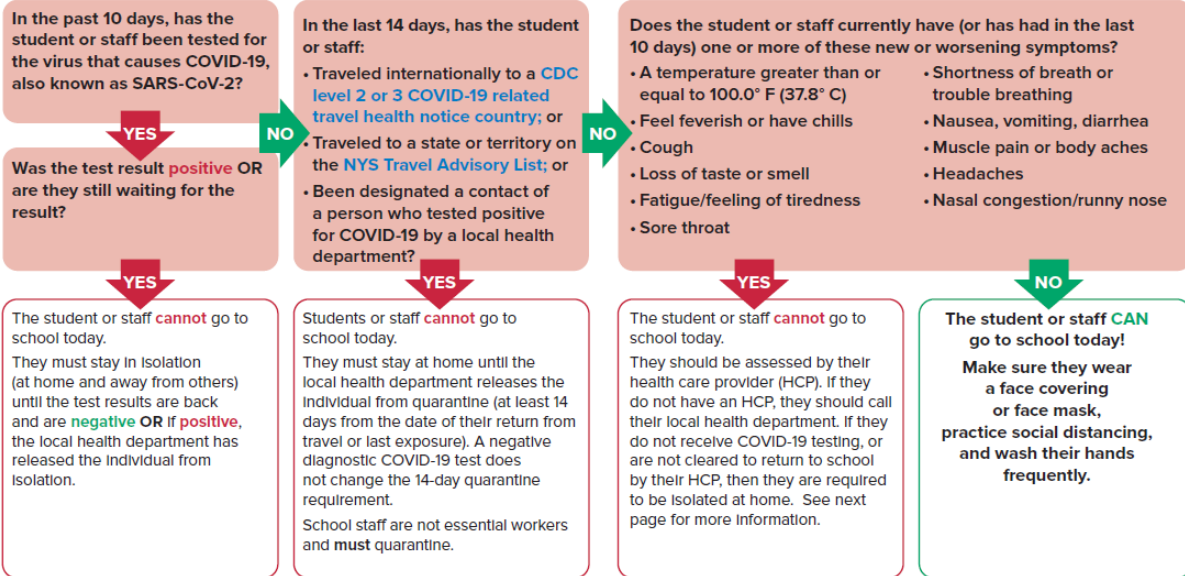

COVID-19 diagnostic testing includes molecular (e.g., PCR) or antigen testing for SARS-CoV-2, the virus that causes COVID-19. Diagnostic testing may be performed with a nasopharyngeal swab, nasal swab, or saliva sample, as ordered by the health care provider and per laboratory specifications. At times, a negative antigen test will need to be followed up with a confirmatory molecular test. Serology (antibody testing) cannot be used to rule in or out acute COVID-19.

NYS DOH COVID-19 Guide for School Administrators and Schools Nurses

COVID-19 Screening Flowsheet for Students and Staff

Communicate to your students and staff that they must report absences, symptoms, and positive COVID-19 test results to your school.

CALL 911 IF A STUDENT OR STAFF HAS:

- Trouble breathing or is breathing very quickly
- Severe abdominal pain, diarrhea or vomiting
- Change in skin color - becoming pale, patchy and/or blue
- Racing heart or chest pain
- Lethargy, irritability, or confusion

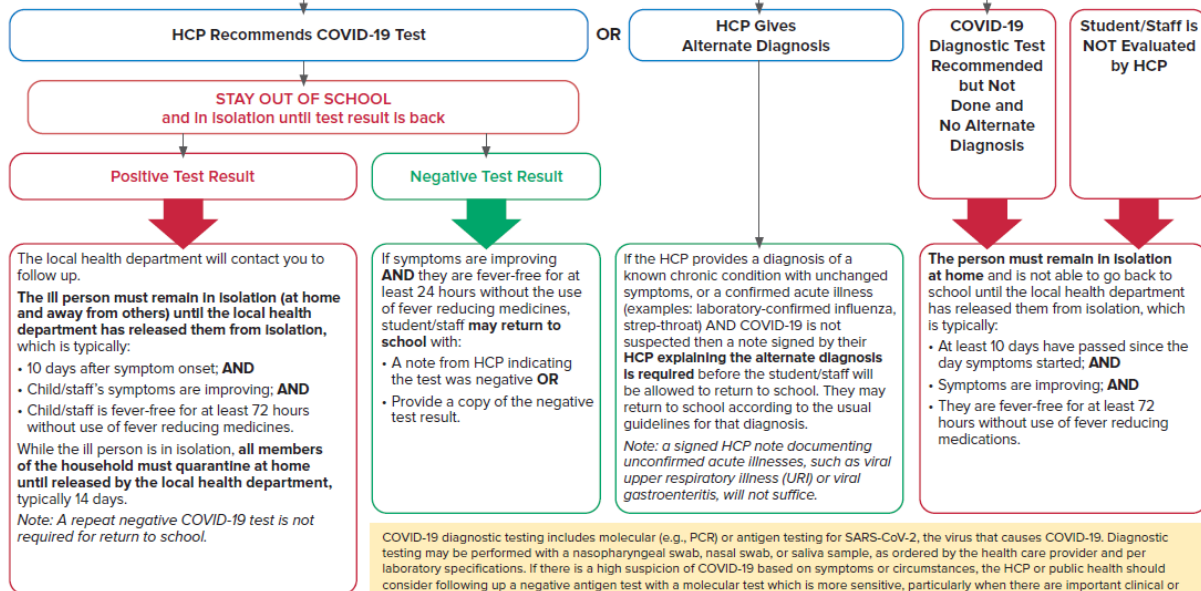

COVID-19 Flowsheet for Student or Staff with COVID-19 Symptoms

Student/staff has symptoms consistent with COVID-19:

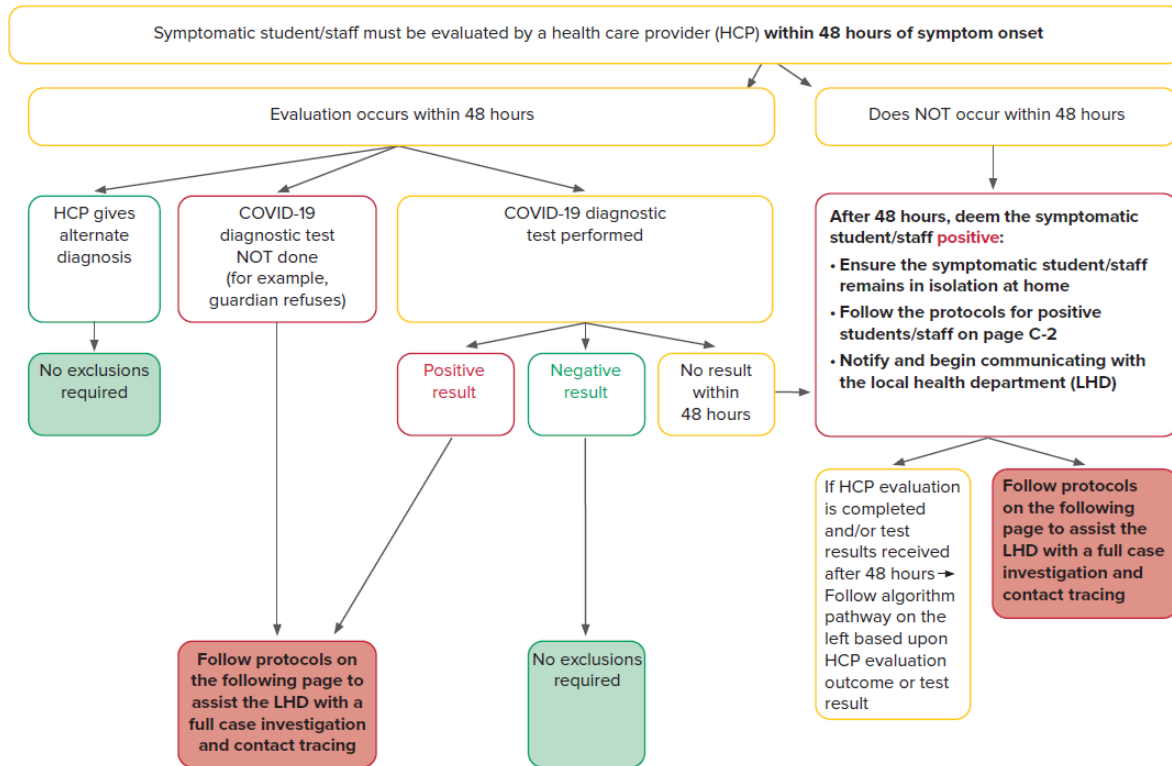

- Student/staff member should keep face mask on.
- Staff members should be sent home immediately.
- Students awaiting transport home by the parent/guardian must be isolated in a room or area separate from others, with a supervising adult present using appropriate personal protective equipment (PPE).
- School administration and the parent/guardian should be notified.

- Provide instructions that the individual must be seen by an HCP for evaluation and have COVID-19 testing (unless determined not necessary by HCP). If they do not have an HCP they should call their local health department.
- Schools should provide a list of local COVID-19 testing locations.
- Clean and disinfect area where the student/staff member was located.

HEALTHCARE PROVIDER (HCP) EVALUATION FOR COVID-19 (can be in-person or by video/telephone as determined by HCP)

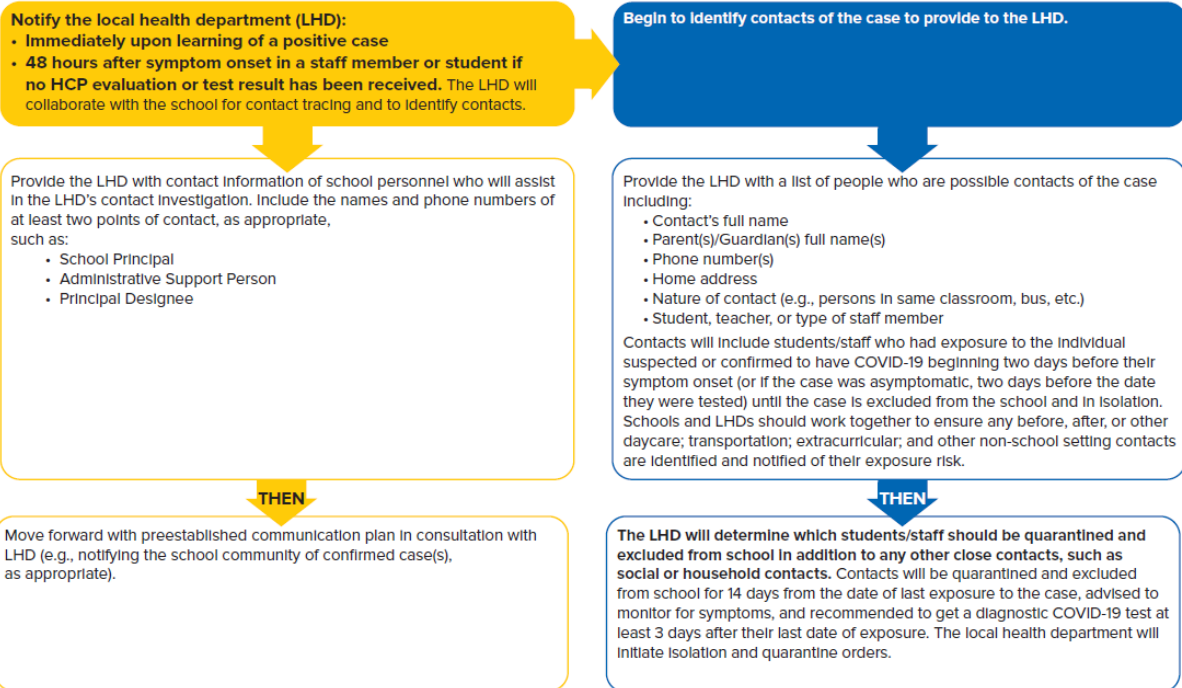

COVID-19 exclusion protocol for contacts of symptomatic students and staff

COVID-19 School and Local Health Department Coordination for Contact Tracing

When to welcome back affected students/staff:

The LHD will determine when students and staff are released from isolation or quarantine and can return to school.

The LHD should communicate to the school a release from isolation or quarantine in order for the student/staff to be welcomed back to the school.

September 2020 | C-4

Reporting Suspected Cases

Spectrum Services will provide timely notifications within 1 hour to the Ulster County Health Department whenever an individual is suspected of having COVID-19. Notifications should be accomplished using the UCDOH Case/Suspected Case notification form which is online here: [UCDOH Case or Suspected Case Notification Form](#). Spectrum Services will fill out the form with as much information as possible and then click the submit button at the bottom of the form. Doing so allows the data to populate a spread sheet used to ensure the Dept has an accurate understanding of COVID-19 activity at the school. It also allows UCDOH to generate statistics that can be used by the school to populate their NYSDOH COVID-19 Report Card. Case/Suspected Case data can also be submitted via secure fax to 845-340-3162 or by email to tracing@co.ulster.ny.us

If submitting by fax or email, the information submitted must include at a minimum the date/time the Suspected Case or Case was identified; the name and contact information of the individual and, in the case of minors, their parent/guardian (including a valid phone number); and the building at which the individual was identified.

UCDOH Reporting to Spectrum Services

Governor Cuomo signed an executive order on September 9 that requires Spectrum Services update the NYSDOH COVID-19 Report Card. The COVID-19 Report Card will provide parents, teachers, students and all New Yorkers with comprehensive data updated on a daily basis, including:

- Positive infections by date of students & staff by school
- Whether school (& student and staff) is remote, in-person, or hybrid
- Number of students and staff on-site
- Percentage of on-site students & staff who test positive
- Number of tests administered by the school, test type, lab used and lag time
- Date of last submission/update

As the school medical staff may not be aware of all COVID-19 testing results, Local Health Departments (LHD) are required to assist in the reporting by ensuring all schools have accurate records of all Cases that have been reported during the last 24 hours. The LHD will consolidate the positive test reporting for Spectrum Services from the state and include any test results that are presented to Spectrum Services by individuals that have obtained rapid tests (or other test results that the State may not be aware of) and subsequently reported to the LHD via the e [UCDOH Case or Suspected Case Notification Form](#). **The Ulster County Health Department will provide Spectrum Services by 2 PM daily a consolidated list of Positive infections by date of students & staff by school.** Testing of Suspected Cases and Contacts

Students or staff who have been identified as suspected of COVID-19 or who are identified as direct or proximate exposures to a suspected or confirmed case will be referred to their primary care physician or to one of the County's testing partners to receive a COVID-19 diagnostic test. Spectrum Services will not directly provide testing to students and staff but will make referrals through the individual's primary care physician or the UCDOH.

There are several privately-operated testing sites throughout Ulster County, and more information can be found by calling (845) 443-8888 or at <https://covid19.ulstercountyny.gov/get-tested/>

Any individual who is suspected of COVID-19 will be ordered by the UCDOH to quarantine pending the results of testing. Spectrum Services will require a note from their primary care physician that they are medically cleared to return to school or a negative COVID-19 test, with a specimen collection date on or after the date they have been identified as a suspected case, in order to return prior to the completion of the quarantine. If they test positive for COVID-19 they will need to go through the UCDOH isolation protocol and be released from isolation by the UCDOH prior to returning to in-person learning.

Spectrum Services will not mandate testing in order to return to school, but if a test is refused, the person suspected of being COVID-positive will need a note from their primary care physician that they are medically cleared to return to school, or they must quarantine for 14 days.

Testing of Travelers and Contacts to Confirmed Cases

Students or staff who are exposed to COVID-19 confirmed individuals, whether outside or within a school facility, or who have traveled for a duration of more than 24 hours to a travel-restricted state, are required to quarantine for 14 days following the date of last exposure or travel. Spectrum Services will encourage these individuals to report their exposure or travel to the UCDOH by calling (845) 443-8888.

If symptoms develop, these direct contacts will be considered to be positive pending verification by a test; testing will be strongly encouraged during routine contact monitoring performed by the UCDOH.

These individuals may not be permitted to return to school facilities until their quarantine period has concluded, as verified by documentation from the UCDOH.

Spectrum Services Contact Tracing Plan

NYSDOH Plan Requirements

Provide details about how each school will work with, support, and supplement the contact tracing efforts of their local health department. Plans must include protocols for symptomatic individuals and positive cases in school, and proximate contacts; and a determination for how students and or staff need to be tested to adequately isolate and mitigate additional exposure to COVID-19. The plan must also specify the roles will the Responsible Party's staff will perform and who among the staff will perform these tests.

While the UCDOH has the primary responsibility for case investigation and contact tracing, effective contact tracing is a collaborative effort that requires the assistance of Spectrum Services and families. Spectrum Services is expected to cooperate fully with UCDOH by providing staff and student lists, schedules, and other information to identify suspected or confirmed cases and exposed individuals and to more efficiently and effectively contain the virus.

Spectrum Services will work with the UCDOH to identify any contacts of all suspected or confirmed COVID-positive students and staff. In consultation with the UCDOH the school nursing staff (medical health staff) will identify direct and proximate contacts and will provide contact information to the UCDOH for each contact using the UCDOH Case or Suspected Case management form.

A Spectrum Services contact is anyone who was within 6 feet of a suspected or confirmed case for a continuous period of 10 minutes or more. Proximate contacts are individuals who have had brief close encounters or extended encounters at a distance greater than 6 feet with a suspected or confirmed case.

Contact Tracing of Suspected Cases

Contacts (direct and proximate) of a suspected case will be ordered to quarantine at the end of a 48-hour period after exposure IF the suspected case:

- fails to provide Spectrum Services with a note from a qualified medical professional indicating the suspected case does not have COVID-19 related symptoms
- fails to provide Spectrum Services with a negative test report obtained after the exposure to school students or personnel.

If the suspect individual's test comes back negative, contacts can remain in class or on school property. If the individual's test comes back positive, direct contacts must go on a mandatory quarantine as ordered by the UCDOH, and they must continue to quarantine for a period of 14 days from last

exposure even if they receive a negative test. Students and staff identified as proximate contacts will be required to quarantine but will be permitted to return to school sooner if they provide a negative test result. However, there is no need to inform or separate contacts of a symptomatic student or staff during the 48 hour waiting period.

Contact Tracing of Confirmed Cases

Any individual who has received notification from the UCDOH or a Primary Care Professional (PCP) that they have tested positive for the virus will receive a phone call from a UCDOH Public Health Care (PHC) nurse. During the case investigation, PHC nurses will elicit contacts for further investigation.

Travelers returning from restricted areas are considered contacts and are expected to quarantine for 14 days from the date they arrived in New York State from a restricted area.

Any individual identified as a direct contact will:

- Be contacted by a NYS Contact Tracer
- Receive quarantine orders for 14 days from the County Health Commissioner
- Be monitored via phone or SMS by trained Contact Tracers
- Be provided support to facilitate their compliance with quarantine orders.

Information Sharing and Data Management

The UCDOH will provide Spectrum Services with a standard format for sharing of information that maintains compliance with HIPAA, FERPA and other appropriate regulatory standards. The document will contain the names, date of birth, age, names and addresses of parents or guardians and contact information of anyone who is identified as a suspected case, a confirmed case, a direct contact or a proximate contact, and exposure dates and locations of anyone who is suspected of having been exposed to a COVID-positive case.

The following is a list of actions to be taken by either Spectrum Services or by the UCDOH as a means of successfully conducting contact tracing:

1. Spectrum Services will ensure that contact records for all staff, contractor, student/family contact records are current and include email and cell phone information
2. Spectrum Services will ensure student schedules are up to date
3. Spectrum Services will maintain a log of any visitors, vendors, or contractors to the schools which includes date and time, and where in the school they visited, and who they interacted with.
4. Spectrum Services will provide a current list of staff and students to the UCDOH, upon request, in order to facilitate identification of positive COVID-19 cases in the schools.
5. Spectrum Services medical teams will notify the UCDOH using the UCDOH Case/Suspected Case Notification form within 1 hour of learning that a staff or student has been or may have been exposed to the virus¹.

¹ COVID-19 is a reportable communicable disease mandated under the New York State Sanitary Code (10NYCRR 2.10, 2.14), including reporting by school nurses (10NYCRR 2.12). While the Family Educational Rights and Privacy

6. Spectrum Services medical teams will notify the UCDOH of any individuals directly exposed ² to the COVID-positive person, along with contact details and the date and nature of exposure.
7. Spectrum Services Medical Team will consult with the UCDOH if uncertain about isolation and/or quarantine guidelines
8. The UCDOH will notify Spectrum Services of any positive test results they receive for staff or students of the school, within 1 hour.
9. The UCDOH will coordinate Contact Tracing with neighboring counties' Departments of Health, to identify any students or staff that live outside of Ulster County. This information will be shared with Spectrum Services.
10. If Spectrum Services is unable to obtain a timely response from the UCDOH, the Spectrum Services Medical Team will provide interim guidance to affected students or staff, until such time as the situation can be reviewed by the UCDOH

Ulster County will use the New York State's Communicable Disease Case Management System (CommCare) to manage and monitor all individuals that are suspected or confirmed cases or have come into contact with a suspected or confirmed case. The CommCare system consists of an online application to manage case and contact data, trained Contact Tracers to monitor the individual via telephone and SMS, and a virtual set of tools to parse, analyze and report the data. The CommCare system is managed by the NYS DOH at the state level and the UCDOH at the county level.

Spectrum Services Rapid Response Plan

If either the Ellenville or Kingston school has three or more active cases at one time, involving more than one classroom, the school should close and work with the Ulster County Health Department's Rapid Response Team on mass testing of staff and students, subject to parent or guardian permission.

Testing will be conducted at one of Ulster County's COVID-19 mobile testing sites or by members of the UCDOH Rapid Response team at a facility chosen in cooperation with Spectrum Services. Anyone tested will be required to go on voluntary quarantine until they receive their test results, and the affected school building will provide remote-only learning for two weeks.

The UCDOH will also work with the New York State Department of Health to manage the containment of any evolving outbreak. Spectrum Services will ensure that all school spaces used by students and staff are cleaned in accordance with NYS requirements and that any space used by a COVID positive or suspected positive individual is decontaminated using the NYSDOH approved guidelines

Act (FERPA) generally requires parental permission for school personnel to disclose personally identifiable information from a student's education record (including health information). But the law provides exceptions allowing disclosure without consent.

² As defined by CDC, NYSDOH

Attachment 1: Model Screening Questionnaire

1. Have you (student or staff member) experienced a fever of 100.0 degrees F or greater, a new cough, new loss of taste or smell or shortness of breath within the past 10 days?

No

Go to the next question.

Yes

No further screening is needed. The individual must be sent home for follow up by their primary care physician health professional and a referral for a Covid-19 test should be made. Notify the Ulster County Health Department via fax to 845-340-3162.

2. In the past 10 days, have you received a positive result from a COVID-19 diagnostic test that was administered by a nose or throat swab? (not a blood test)

No

Go to the next question.

Yes

No further screening is needed. If ill, the individual must be sent home for follow up by their primary care physician health professional. The individual or family should be encouraged to follow Ulster County Health Department isolation guidance. Notify the Ulster County Health Department via fax to 845-340-3162.

3. To the best of your knowledge, in the past 14 days, have you been in close contact (within 6 feet for at least 10 minutes) with anyone while they had COVID-19?

No

If ill, the individual should be sent home. Regular illness protocols should be followed. Go to the next question.

Yes

No further screening is needed. If ill, the individual must be sent home for follow up by their primary care physician health professional. The individual or family should be encouraged to follow Ulster County Health Department quarantine guidance. Notify the Ulster County Health Department via fax to 845-340-3162.

3. In the past 14 days, have you returned from travel to one or more restricted states as identified by NYSDOH (<https://coronavirus.health.ny.gov/covid-19-travel-advisory>)?

No

If ill, the individual should be sent home. Regular illness protocols should be followed.

Yes

If ill, the individual must be sent home for follow up by their primary care physician health professional. The individual or family should be encouraged to follow New York State Traveler Guidance and to complete the Traveler Health Form (<https://coronavirus.health.ny.gov/covid-19-travel-advisory>) or call (845) 443-8888.

Attachment 2: COVID-19 FAQ for Schools

Pre-K to 12th Grade

Last Updated: August 12, 2020

Ulster County Department of Health (UCDOH)

Q1: When and how should we report positive COVID-19 cases to UCDOH?

A: Immediately notify UCDOH if a student, faculty or staff member tests positive for COVID-19:

- Notifications should be accomplished using the UCDOH Case/Suspected Case notification form which is on line here: [UCDOH Case or Suspected Case Reporting Form](#). The school should fill out the form with as much information as possible and then click the submit button at the bottom of the form.
- Alternatively, the school can provide the information requested in the form via secure fax to 845-443-8888, and/or tracing@co.ulster.ny.us

Q2. Are schools responsible for contact tracing for students, faculty and staff?

A: While UCDOH has the primary responsibility for contact tracing, effective contact tracing is a joint collaborative effort - UCDOH will need the assistance of schools in providing staff and student lists and schedules and other information to identify exposed individuals, arrange for testing, etc.

Q3. Will contact tracers release the name of the positive individual to their contacts?

A: No. Contact tracers will tell potentially infected persons that they were exposed – they will not disclose the identity of the person to whom they were exposed.

Q4. How long will contacts to positive COVID-19 cases be required to quarantine?

A: Individuals who are exposed to someone with COVID-19 will be required to quarantine for 14 days from the day they were last exposed. Please note that a negative test does not release an individual from quarantine.

Q5. What resources will an isolating or quarantined person require?

A: An isolating or quarantined person will need access to a private room and a private bathroom. Individuals will also need access to food, medications and other essential items that will allow them to remain in quarantine. People who need assistance during quarantine or isolation can call 845-443-8888

Q6. When should an exposed individual get tested for COVID-19?

A: Testing should be conducted approximately 5 days after exposure. Exposed individuals must remain on quarantine until being tested and must immediately return to quarantine following such testing. If a

person tests positive, they will be placed in isolation (for a period determined by the UCDOH). Even if the test is negative, the individual must continue to quarantine for the full 14 days

Q7. Where can students, faculty and staff get tested for COVID-19?

A: A list of testing sites can be found on the Ulster County COVID-19 website <https://covid19.ulstercountyny.gov/get-tested/>

Students, faculty and staff can also call the Ulster County Hotline (Recovery Service Center) at 845-443-8888, or the NYS COVID-19 hotline at 1-888-364-3065 for assistance locating a testing site.

Q8. Is there a charge for COVID-19 tests?

A: Charges may vary. Testing is covered by most insurance companies and will have zero patient cost or a standard co-pay. The most reliable way is to get tested for free is at a state-run test site, which is available at the mobile testing site at Anthony Wayne Recreational Area in Harriman State Park; for appointments and hours call (888) 364-3065.

Q9. When can a person who has tested positive return to school? Is it the same process for students, faculty and staff?

A: If the individual who tested positive has symptoms (Fever, Cough, Shortness of Breath/Difficulty Breathing, Chills, Repeated Shaking with Chills, Muscle Pain, Headache, Sore Throat, or New Loss of Taste or Smell) the Clearance Criteria for release from isolation are:

- It's been at least 10 days since the individual first started experiencing symptoms; AND
- The individual hasn't had a fever in at least 3 days, without taking fever-reducing medication (such as Tylenol); AND
- Any shortness of breath/coughing/difficulty breathing, chills, repeated shaking with chills, muscle pain, headache, sore throat, or new loss of taste or smell has improved.

If the individual who tested positive is asymptomatic the Clearance Criteria are:

- It's been at least 10 days since the person's first positive COVID-19 test was collected; AND
- The individual hasn't had any subsequent illness

Q10. Can we assume that students with antibodies are safe from contracting COVID-19?

A: No, we do not have enough information about whether antibodies protect individuals from re-infection and how long antibodies may provide protection. Antibody tests also CANNOT diagnose if an individual has active infectious COVID-19. A positive result can mean you had infection with COVID-19 in the past. A different test would be needed to determine active infection.

Q11. Are rapid tests (Antigen or Molecular) reliable?

A: Rapid tests provide results in under an hour, though they have a high rate of false negatives. Rapid antigen tests which are the most commonly performed rapid COVID-19 test cannot rule out COVID-19 and should be followed up by a molecular test. Please see the FDA Coronavirus Testing Basics site, which includes a video.

<https://www.fda.gov/consumers/consumer-updates/coronavirus-testing-basics>

Q12. Do students coming back from vacation from states on Governor Cuomo's travel advisory need to quarantine?

A: Yes, students who are coming to New York from any of the states on the travel advisory need to quarantine for 14 days. The most up-to-date list of states is available here.

<https://coronavirus.health.ny.gov/covid-19-traveladvisory#restricted-states>

Q13. What qualifies as an exposure to COVID-19?

A: Close contact is defined as being within 6 feet of a person displaying symptoms of or testing positive for COVID-19 for 10 minutes or longer. Close contacts will be required to quarantine. Proximate contact is defined as being in the same enclosed environment such as a classroom or office, but greater than 6 feet from a person displaying symptoms of or testing positive for COVID-19. UCDOH will determine if a proximate contact should be under quarantine.

QUARANTINE & ISOLATION CLARIFICATIONS

Q14. Why is the isolation period for an infected person shorter than the quarantine period of a contact?

A: The time period for incubation is different from the time period of illness and infectiousness. When a person is exposed to COVID-19, it can take anywhere from 2-14 days for the person to develop the disease (incubation), hence the quarantine period is 14 days. Once the disease develops, a person is infectious from 2 days prior to symptoms appearing to, at minimum, 10 days after the symptoms develop, hence the isolation period is at minimum 10 days, but can be longer.

Timeline of Infection: Window of Opportunity

Image Courtesy of Johns Hopkins University/Bloomberg School of Public Health

Q15. Can you leave quarantine for a Covid-19 test or does your quarantine start all over after you went out to get that test?

A: Yes, you can leave quarantine for a COVID-19 test however during travel to and from testing you should minimize contact with others, wear a mask/ face covering, observe distancing and utilize private means for transportation. No, your quarantine period does not re-start. However, even if you test negative, you must continue to quarantine until the full 14 days from the last exposure to a COVID-19 positive individual.

CONTACT TRACING QUESTIONS:

Q16. In the event there is a large exposure, what is the plan if the DOH gets overwhelmed with the case load once school starts?

A: The Ulster County Department of Health has been working in conjunction with the New York State Department of Health on contact tracing, using a joint system for tracking cases and contacts, This system also allows for both the county and state to have increased capacity of contact tracing should it be needed.

Q17. How do those testing positive at sites or who live outside of Ulster County or New York State integrate into the NYSDOH systems?

A. Lab reports from 'out of jurisdiction' are transferred and reported to the state/county of residence (of record) of the individual. So for instance, if an Ulster County resident tests at a location in New Jersey, that lab result is reported to the New Jersey Department of Health, who transfers it to New York State Department of Health, and subsequently the Ulster County Department of Health. (Note: please make sure your current phone and address are correct at a testing location, so the results can be reported to the correct jurisdiction and local health department can follow up with communication). NYSDOH obtains lab reports on individuals who do not live (but work) in Ulster County and provides these to UCDOH. Likewise, if a school employee or student lives outside of Ulster County, we will notify the relevant County.

QUESTIONS RELATED TO HOUSEHOLD CONTACTS:

Q18. If a child tests positive and has a sibling in the school, should the school keep the sibling out of school?

A: Yes, unless the siblings reside in separate households, the sibling must be placed on quarantine which would mean that the sibling should not attend school during the required period for quarantine.

Q19. If a student/staff member is home on quarantine and then develops symptoms, please explain how that impacts attendance to school/work and what it means for the siblings that may have been continuing to go to school.

A: If a student or staff tests positive, their household members will likely be considered close contacts and will need to quarantine. Students or staff testing positive will require isolation for a minimum of 10 days

Q20. If someone has to quarantine and has a family member in isolation is it 10 days+14 for the quarantine. Or would it be 4 more days?

A: Determining quarantine periods can vary depending on the particular situation; the specifics will be determined in conversation with the Department of Health case investigators and contact tracers. Here are some sample scenarios (CDC: <https://www.cdc.gov/coronavirus/2019-ncov/if-you-are-sick/quarantine.html>):

Scenario 1: Close contact with someone who has COVID-19—will not have further close contact.

I had close contact with someone who has COVID-19 and will not have further contact or interactions with the person while they are sick (e.g., co-worker, neighbor, or friend). Your last day of quarantine is 14 days from the date you had close contact.

Date of last close contact with person who has COVID-19 + 14 days = end of quarantine

Please note if your quarantine starts at noon on day 1, then it would end at noon on the last day.

Scenario 2: Close contact with someone who has COVID-19—live with the person but can avoid further close contact

I live with someone who has COVID-19 (e.g., roommate, partner, family member), and that person has isolated by staying in a separate bedroom. I have had no close contact with the person since they isolated. Your last day of quarantine is 14 days from when the person with COVID-19 began home isolation.

Please note if your quarantine starts at noon on day 1, then it would end at noon on the last day.

Scenario 3. Under quarantine and had additional close contact with someone who has COVID-19

I live with someone who has COVID-19 and started my 14-day quarantine period because we had close contact. What if I ended up having close contact with the person who is sick during my quarantine? What if another household member gets sick with COVID-19? Do I need to restart my quarantine? Yes. You will have to restart your quarantine from the last day you had close

contact with anyone in your house who has COVID-19. Any time a new household member gets sick with COVID-19 and you had close contact, you will need to restart your quarantine. Date of additional close contact with person who has COVID-19 + 14 days = end of quarantine

Scenario 4: Live with someone who has COVID-19 and cannot avoid continued close contact

I live in a household where I cannot avoid close contact with the person who has COVID-19. I am providing direct care to the person who is sick, don't have a separate bedroom to isolate the person who is sick, or live in close quarters where I am unable to keep a physical distance of 6 feet. You should avoid contact with others outside the home while the person is sick, and quarantine for 14 days after the person who has COVID-19 meets the criteria to end home isolation. Date the person with COVID-19 ends home isolation + 14 days = end of quarantine

Please note if your quarantine starts at noon on day 1, then it would end at noon on the last day.

Q21. If a person travels to a state with a mandatory quarantine upon return to NY, but their child, who lives with them, did not travel, does the child also have to quarantine, or can they attend school?

A: No, the child can attend school as long as the traveler in the household remains asymptomatic and does not test positive for COVID-19.

Q22. Does the student have to quarantine if the parent had contact and is quarantining, but does not have symptoms?

A. If a member of the household is quarantining because of either a known exposure to a COVID-19 positive individual or because of travelling, other members of the household can leave the home if that person can quarantine properly from the household members. A quarantined person should:

- Separate themselves from other members of the household
- Use a separate bedroom and bathroom
- Do not share linens, towels, eating utensils, cups and plates

- Limit time in common household areas, such as kitchens.

Q23. What is the timeframe for contract tracing? Will you work with the school immediately? What if we are notified in the evening and siblings may be at school in am.

A: UCDOH will notify relevant school staff upon learning of a positive test for COVID-19 at the school. UCDOH also verifies that individuals reporting a positive COVID test have a positive lab test result in order to proceed with further measures. Labs are required to report to New York State Department of Health any positive test results immediately, and local health departments aim to contact positive individuals within 24 hours of receiving that lab report. Schools should be conducting daily health screenings, including asking whether the child/staff has been in contact with a person who has tested positive.

SHARING OF MEDICAL INFO/PARENTAL PERMISSION

Q24. Do schools need parental permission to send COVID-19 related medical information to DOH?

A: COVID-19 is a reportable communicable disease mandated under the New York State Sanitary Code (10NYCRR 2.10, 2.14), including reporting by schools nurses (10NYCRR 2.12).

<https://regs.health.ny.gov/volume-title-10/content/reporting-cases-records>

https://www.health.ny.gov/forms/instructions/doh-389_instructions.pdf

While the Family Educational Rights and Privacy Act (FERPA) generally requires parental permission for school personnel to disclose personally identifiable information from a student's education record (including health information). But the law provides exceptions allowing disclosure without consent. Under the "health or safety emergency" exception, even though a student's positive COVID-19 test would be considered personal identifiable information, the school may report this information without parental consent to individuals whose knowledge of the information is necessary to protect the health or safety of students or other individuals. (See 20 U.S.C. § 6 1232g(b)(1)(I); 34 C.F.R. §§ 99.31(a)(10) and 99.36.) These may include public health officials, school administration, trained medical personnel, school staff, and parents. The "health or safety emergency" exception is limited in time to the period of the emergency and generally does not allow for a blanket release of personal identifiable information from student education records.

THRESHOLD QUESTIONS:

Q25. Is there a threshold of infections or absentee rates that would indicate a school should close?

A: The Ulster County Department of Health does not make the decision as to whether a school or classroom should be closed because of COVID-19. That decision rest solely with Spectrum Services. The

Ulster County Commissioner of Health has the legal authority to determine who needs to isolate and quarantine due to COVID-19 positive cases and/or exposure to a COVID-19 case.

Q26. What parameters/conditions/metrics should we use as an early warning sign that positive cases or absenteeism are increasing beyond an acceptable rate?

A: Generally, schools in regions in Phase IV (which the Mid-Hudson entered on July 7th) can reopen if daily infection rate remains below 5% using a 14- Day Average. Schools will close if regional infection rate raises over 9% after August 1st. (To see the regional rate, go to <https://forward.ny.gov/early-warning-monitoring-dashboard>)

Q27. With regards to screening, should it be prior to entering the building or before they leave their house?

A: Spectrum Services is required to have a protocol in place to perform temperature and health screenings for COVID symptoms. Screenings by the parent/guardian prior to school are preferred. (See the NYSED Reopening Guidance). Symptomatic individuals should not leave their households. Parents/guardians/ students should be provided with information explaining the importance of monitoring for symptoms and remaining at home when ever symptoms are recognized.

Q28. Previously, if there was a case, we had to close a building for 24 hours. Is that still the case?

A: Typically, a 24 hr. time period may be required for disinfection of an area or building. If disinfection can be conducted overnight or during a weekend disruption of classes could be minimized. The CDC and NYSDOH recommend:

- Closing off areas used by a sick person and not using these areas until after cleaning and disinfection has occurred;
- Opening outside doors and windows to increase air circulation in the area.
- Waiting at least 24 hours before cleaning and disinfection. If waiting 24 hours is not feasible, wait as long as possible;
- Clean and disinfect all areas used by the person suspected or confirmed to have COVID-19, such as offices, classrooms, bathrooms, lockers, and common areas

Go to the NYSED guidance for more information:
